# Lead Line Watersports Cruising

Winner in the heavyweight division: Anchor warp with braided lead inlay for an optimised sag line without a forerunner chain.

## **Perfect function**

The environmentally friendly encapsulated lead core in the last 10 m section supports the digging in of the anchor.

## **Perfect handling**

Extremely flexible, durable polyester double braid that does not harden during use.

# Perfect workmanship

Ready to use with spliced-in stainless steel thimble for connecting the anchor.

## **Colors**

# Technical data

Elongation at 10% of the breaking load: 2.00 %

Ø [mm]	Weight [kg/100 m]	Bl. real in splice [kN]	BI. linear DIN according to EN ISO 2307 [kN]
10 mm Ø	4.40	12.50	13.90
12 mm Ø	5.56	18.00	20.00
14 mm Ø	6.89	26.50	29.40
16 mm Ø	8.21	32.00	35.60
